Dreamcipher

Cross platform, open source and free device management tool written in Go

macOS Linux Windows Apple Silicon Intel Arm64 Amd64 Go 1.21+ MIT License

Latest Release v0.0.1 Release Date 2026-03-15

Download

macOS Linux Windows

Installation Instructions

Windows

```
winget install dreamcipher
```

Requires winget (Windows Package Manager). Run `dreamcipher --version` to verify.

macOS

- **Apple Silicon**: Download the `.pkg` file for `darwin/arm64`.
- **Intel**: Download the `.pkg` file for `darwin/amd64`.

Open the `.pkg` and drag Dreamcipher to Applications.

Linux

- **Apt/deb**: Download `.deb`, and run:
- **dnf/yum**: Download `.rpm`, and run:

```
sudo dpkg -i dreamcipher_0.0.1_amd64.deb
```

```
sudo rpm -i dreamcipher_0.0.1_amd64.rpm
```

Make sure to be "sudo pacman -Syu" otherwise it's not going to find libnewt/libslang-2.so.1.0.
